DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 10/13/04 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document, each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Paul (US 2,337,767).

Paul discloses a protective covering on a welding device comprising a cover, being non-flammable, having a front panel and a rear panel connected by connecting means (wire 5), enabling the two panels to be adjusted, a tubular rim (cover 10) made by several panels connected together (figures).

Allowable Subject Matter

4. Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior arts of record fail to teach panels having openings to let the pliers passed through.
